

Bharat Athlete

Sports day, simplified.

The ultimate solution for Indian schools to manage inter-house matches and sports days.

The constant noise of a traditional sports day

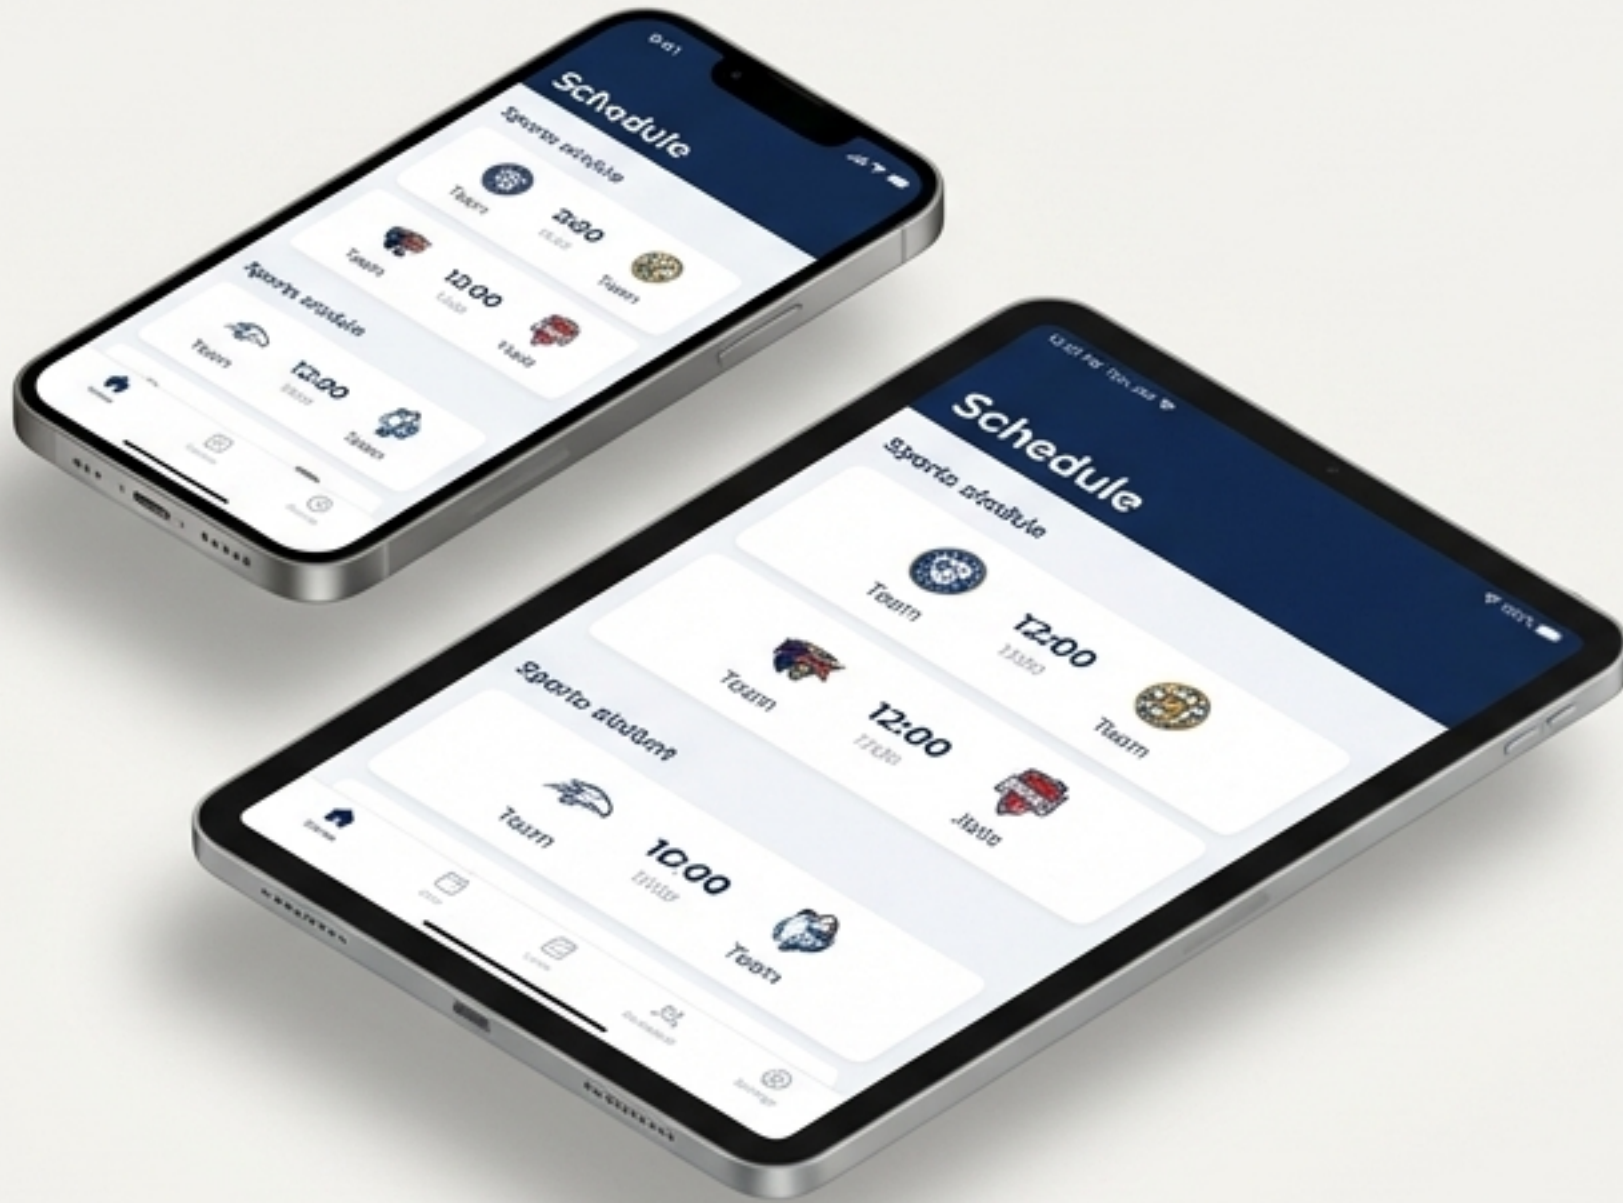

Coordinators are spending more time answering calls and resolving disputes than actually running the event.

The scattered truth

- Fixtures are in one Excel file.
- Updates are buried in a WhatsApp group.
- Results are on handwritten, lost, or smudged paper.
- Recounts and disputes eat up valuable time.

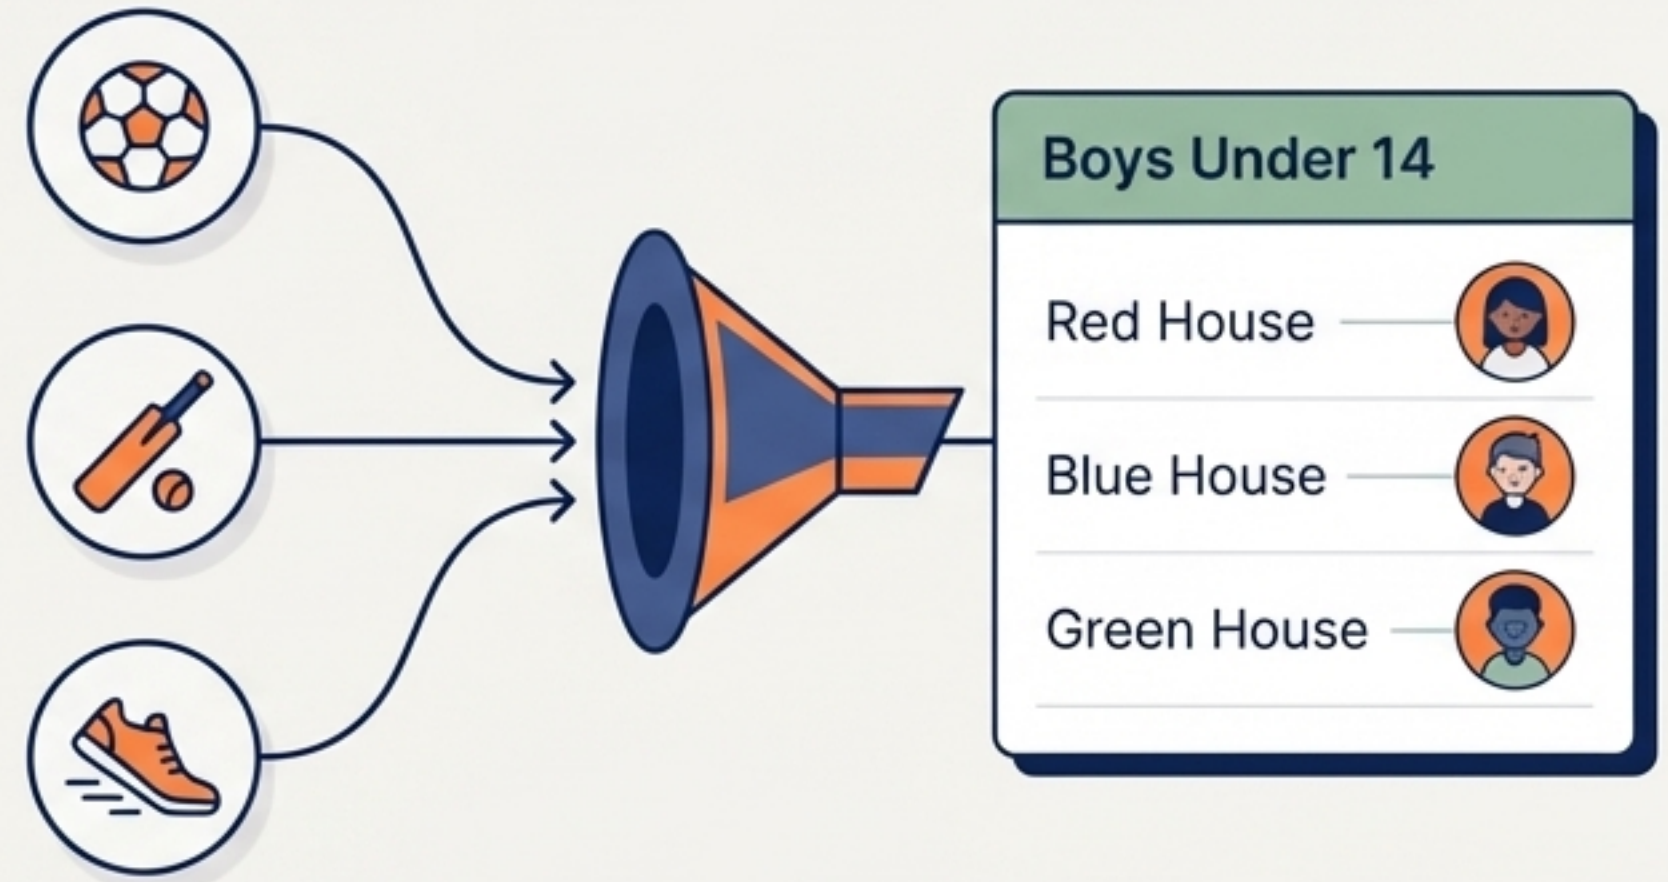

One place. One truth.

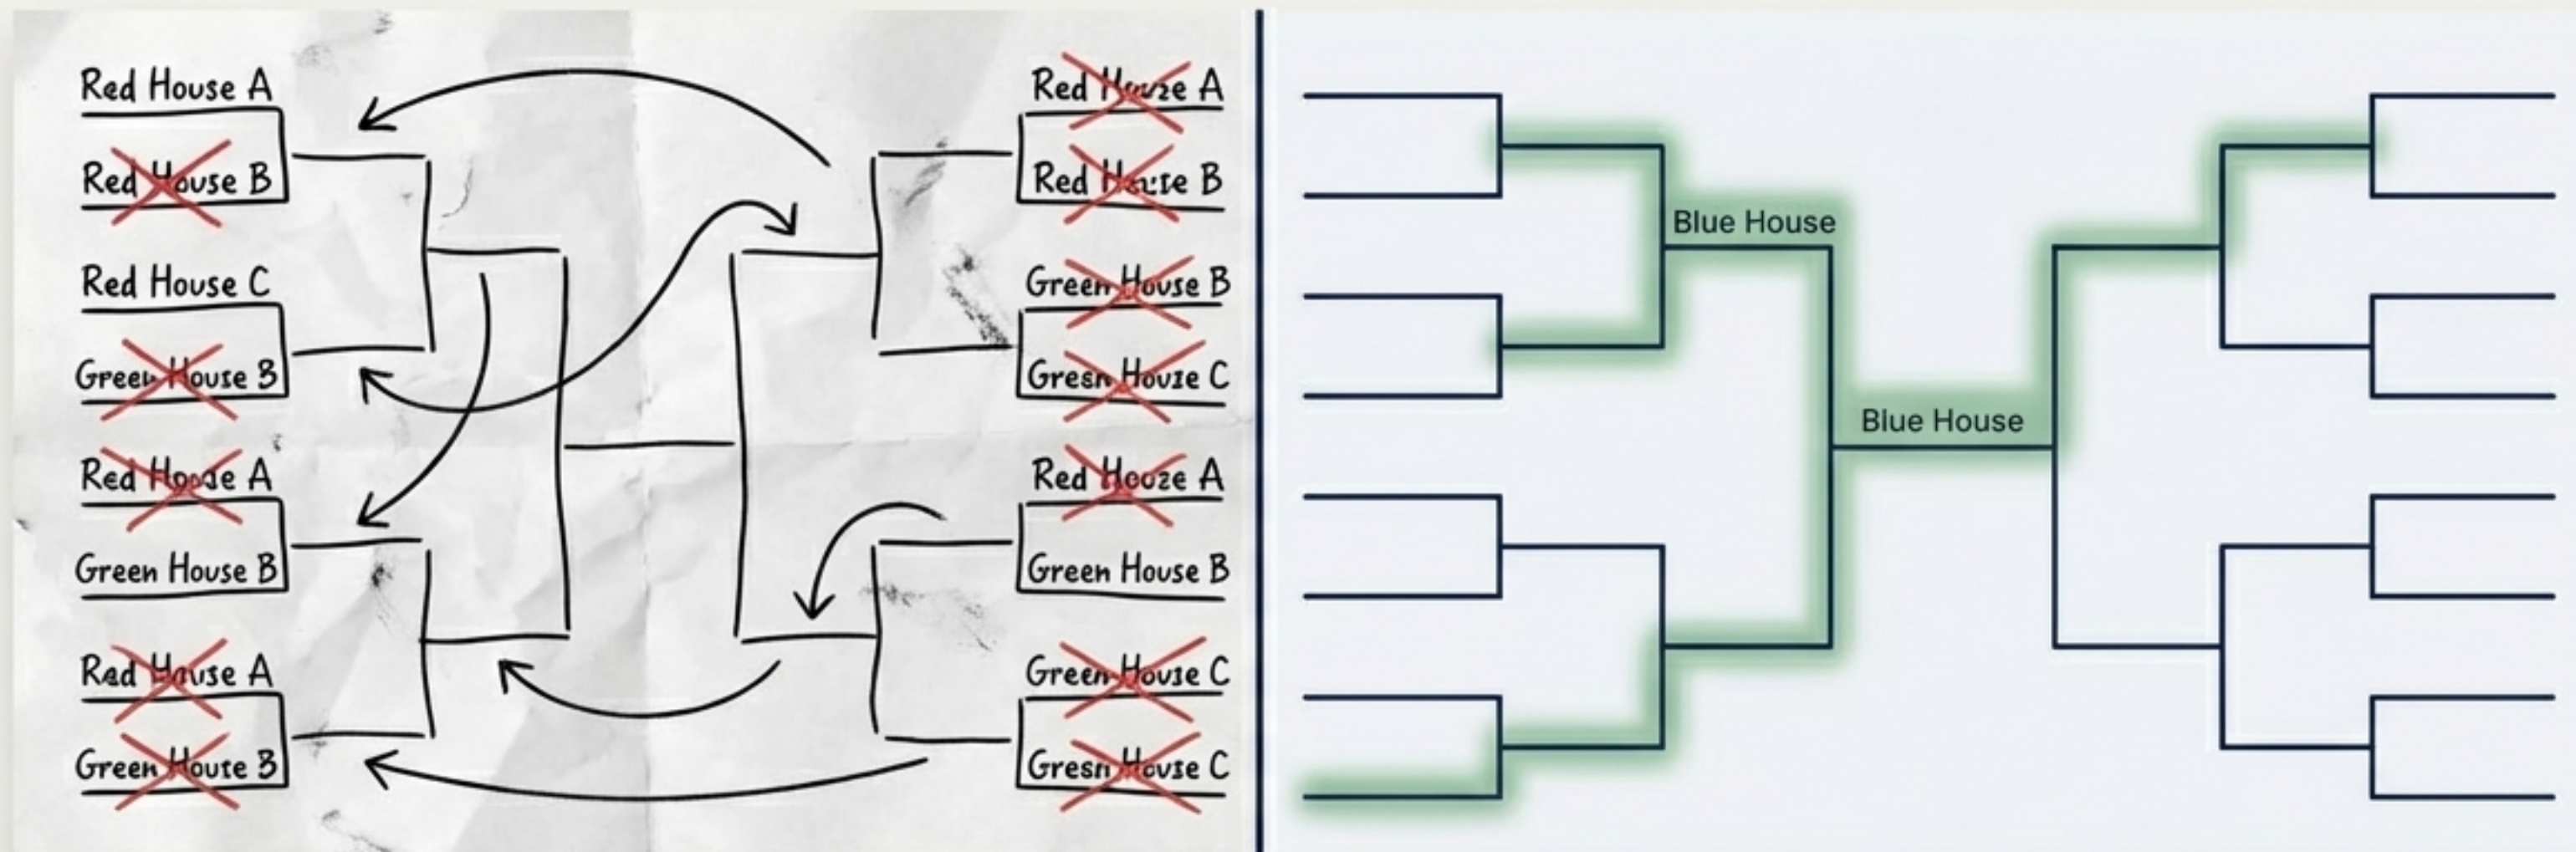

- ✓ Less paperwork.
- ✓ Less WhatsApp coordination.
- ✓ Zero “who has the latest sheet?” confusion.
- ✓ A single platform where coordinators, teachers, students, and parents all see the exact same truth.

Create competitions and link teams in minutes

- Add event name, dates, and academic year instantly.
- Pick from a comprehensive list of sports and create custom categories.
- Bulk-add teams (e.g., Red House, Blue House) rather than creating them one by one.
- Link students directly to teams so names and classes appear accurately on all scorecards.

Intelligent brackets that build themselves

One-click generation:

Hit 'Generate bracket' to create all matches and rounds instantly.

Automatic progression:

Enter a match winner, and the next fixture updates automatically.

No more redrawing:

brackets by hand when a team drops out or a schedule changes.

Scorecards that actually know the rules

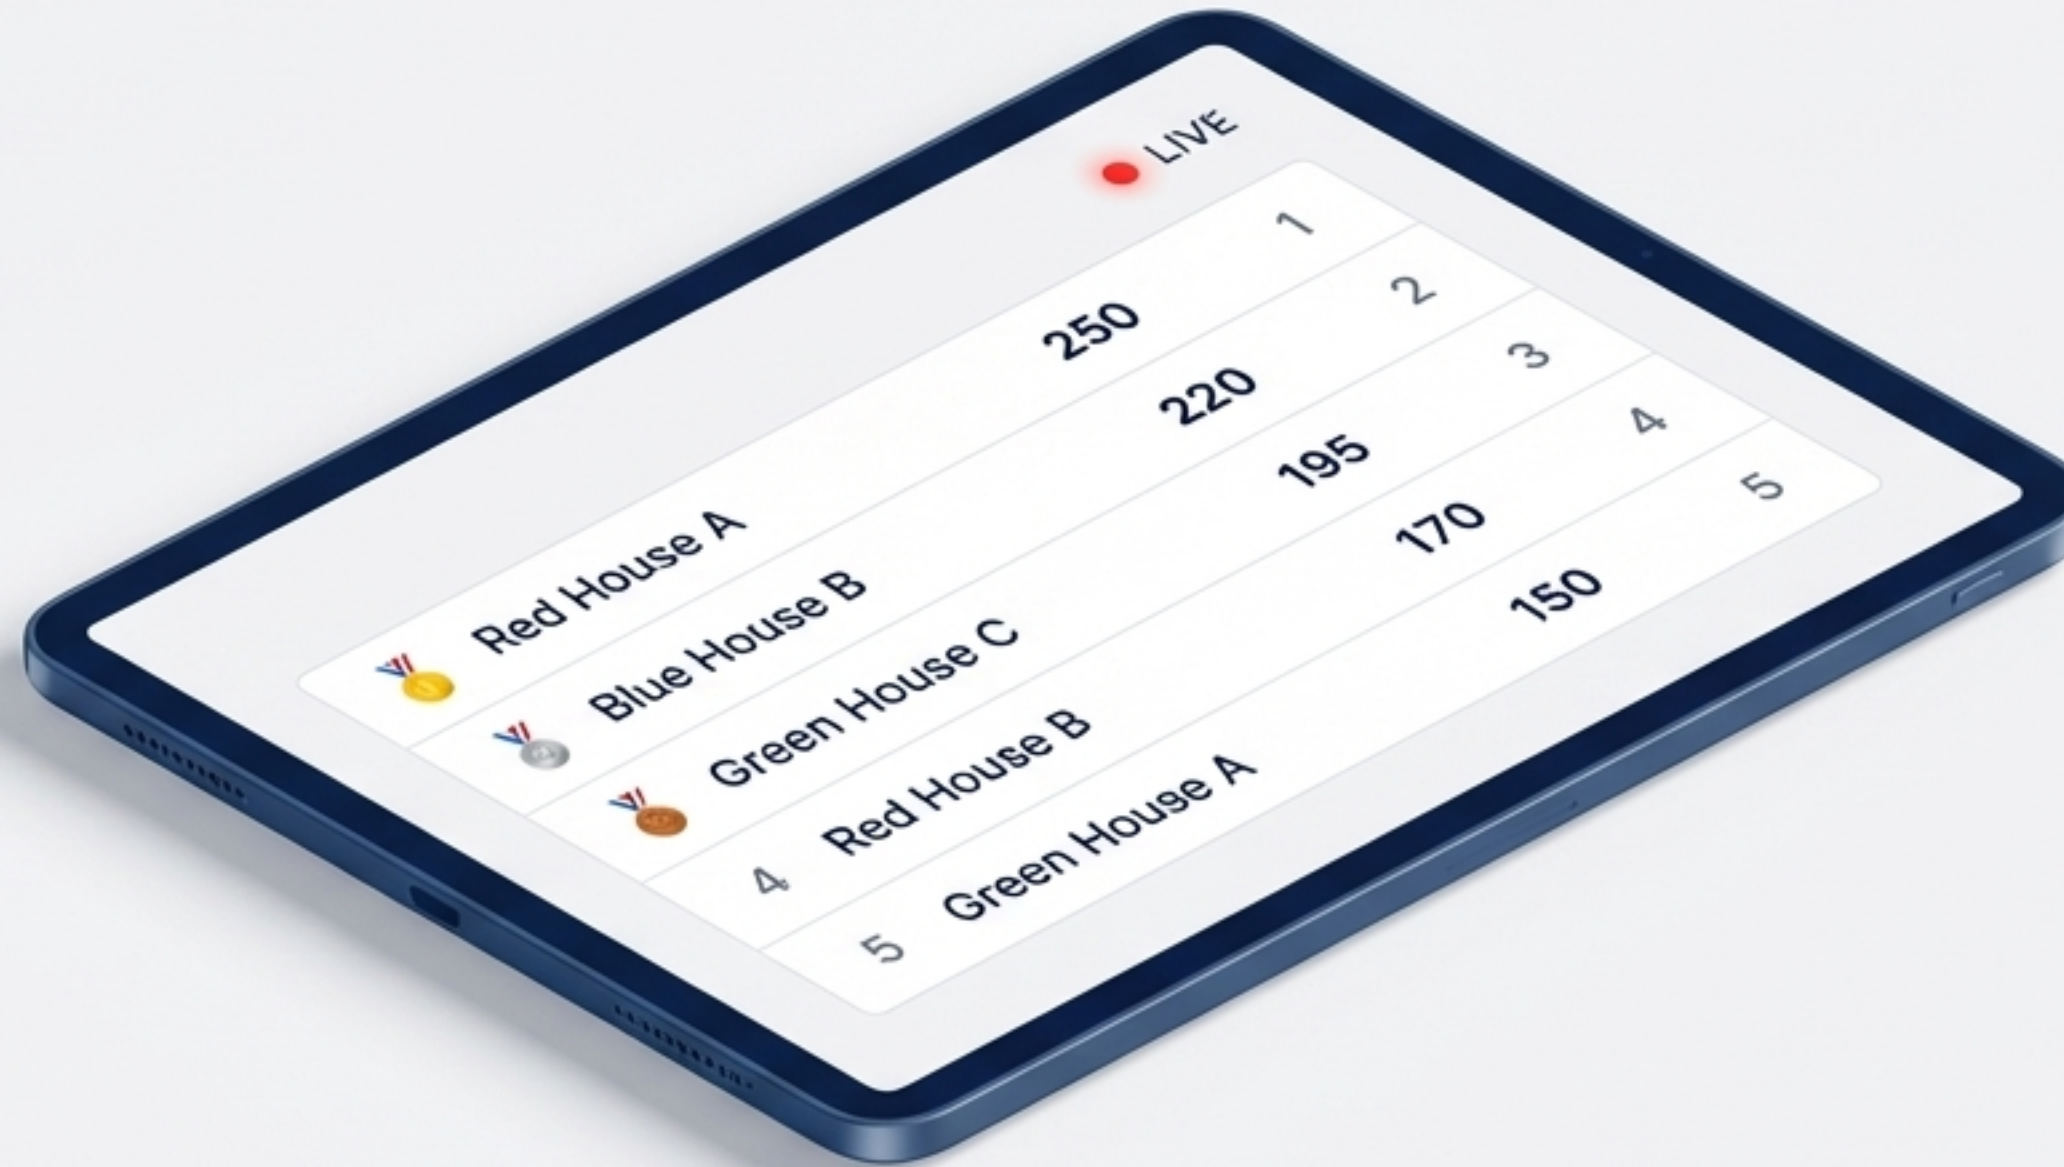

- Sport-specific tracking formats built right in.
- Rule validation prevents manual errors.
- Result: Fewer mistakes, zero arguments, and total trust in the outcome.

The image displays three overlapping scorecard templates for different sports:

- Football**: Features a "Goals" label and an empty input field.
- Cricket**: Features "Runs" and "Wickets" labels, each with an empty input field.
- Volleyball - Set 1**: Features a "Score" label and two input fields. The first field, labeled "Team A:", contains the value "25". The second field, labeled "Team B:", contains the value "24".

An orange callout bubble points to the "25" in the Team A score field, containing the text: **Invalid Score:**
Win-by-2 rule required

Live leaderboards end the guessing game

A tablet displaying a live leaderboard for a guessing game. The screen shows a table with five rows of data. Each row represents a house and its score. The scores are listed in descending order: 250, 220, 195, 170, and 150. The table is titled 'LIVE' with a red dot. The rows are labeled with house names and their corresponding scores. The first row is 'Red House A' with a score of 250. The second row is 'Blue House B' with a score of 220. The third row is 'Green House C' with a score of 195. The fourth row is 'Red House B' with a score of 170. The fifth row is 'Green House A' with a score of 150. The table is displayed on a tablet with a dark blue frame.

	1	2	3	4	5
Red House A	250				
Blue House B	220				
Green House C	195				
Red House B	170				
Green House A	150				

Instant updates: As soon as a match is finalised, the result automatically syncs to the bracket and the overall leaderboard.

See who is leading in every category at a single glance.

The final table is always accurate and available to everyone immediately.

Unified data, distributed control

Role-based access ensures the right people have the right permissions.

Admins and coordinators manage the overall competition.

Teachers and coaches are given targeted access to enter scores strictly for their assigned matches.

Eliminates the bottleneck of “only one person has the file.”

We are just getting started

Bharat Athlete is evolving from an organisational tool into a complete sports broadcasting and celebration platform. Here is a preview of what is coming next for schools, students, and parents.

The Public Webpage: Zero logins, total visibility

- One dedicated link per event to share with all students and parents.
- Zero login required to access.
- Provides real-time access to live scores, current rankings, and the “who plays next” schedule.
- Completely removes the need for parents to call the school for updates.

Global rankings to elevate your sports programme

- See exactly where your school's athletes and teams stand compared to others across the district or region.
- Motivates students by benchmarking their performance against a wider peer group.
- Gives the school's sports programme valuable external visibility and prestige.

Automated celebration at the finish line

Instant bulk certificate generation for 1st, 2nd, 3rd place, and participation. Print or download in minutes, not days.

One-tap social media sharing allows students to post verified achievements ("I came 1st in 100m") directly to Instagram and Facebook.

Everybody wins on sports day

School Management

Less chaos, a highly professional image, and one unified dashboard for all sports events.

Coordinators & PE Teachers

Drastically less paperwork, no repeated questions, and time freed up to actually run the event.

Students

Fair, rule-validated results and total clarity on their performance and team standings.

Parents

One simple link for live score updates without ever needing to call the school.

Ditch the spreadsheets. Focus on the games.

 Who has the latest fixture?	 One app for all updates.
 Is this score correct?	 Sport-specific scorecards with rule checks.
 Where's the leaderboard?	 Live, automated updates.
 Parents keep calling	 One public link for live tracking.

If your school still runs sports on WhatsApp and Excel, it's time for a change.
Let the app handle the heavy lifting while you focus on the kids.
